THE COMPANY

With a deep commitment to superior service, we empower you to make informed, sustainable decisions; mitigate risks; and generate meaningful and measurable results.

The Proof Is in Compliance

Data breaches. Environmentally irresponsible disposition. Changing regulations. Lost value. These are the risks in the market. And we're here to solve them. Others may make bold promises, but we back our promises with investments in the global processes, systems and compliance protocols required to deliver solutions you can trust.

Virogreen is going above and beyond, defining a universal approach to environmental compliance on a global scale while exceeding the requirements of any single, existing industry standard.

ABOUT US

We started of as a company with a vision and a dream. We wanted a recycling company that focuses on our customer's requirements as our No.1 priority. Then we found two words that we know we must live-by and put into action every moment we spent building this company.

Integrity & Transparency

OUR VALUES

To intelligently capture the enduring value of IT Assets, benefiting our clients, our buyers, and our planet while maintaining ethical business practices.

- VALUE FOCUSED
- ONE GLOBAL STANDARD
- ZERO-STOP POLICY

You've got IT Assets. We've got Solutions.

Committed to contributing to the sustainable development of society on a global scale.

Value Focused

From sustainability benefits to greater financial return on retired assets and data protection.

One Global Standard

We operate from a single global standard, and across the largest global footprint in the industry, enabling a unified approach to every customer, every asset.

Zero Stop Policy

Consistency, transparency and confidence. Our uniform standards and quality controls ensure our clients now have a single- source option.

CHAIRMAN STATEMENT

At Virogreen, we want to create outstanding value for our customers, employees, stakeholders, and the global community by leveraging our unique combination of security, value recovery, and environmental expertise.

LEE WEIKWANG

Virogreen Group Of Companies (Director)

“Your trust is our Success.”

We strive to contribute to the development of a sustainable economy and society through innovation in the areas of IT waste disposal and recovery

Virogreen is an integrated resource recovery and data sanitization company dedicated to being a global corporation on sustainable corporate practices. Ensuring ethical supply chain distribution and stringent facilities is the hallmark of Virogreen. We pursue technical rationality and efficiency while ensuring environmentally sound operations. We are working to promote recycling of resources and materials to achieve zero emissions.

Sustainable development of society on a global scale

We understand the common challenges faced when managing IT equipment throughout its lifecycle, providing cost effective solutions whilst achieving compliance with all local and international data security, environmental, and industry regulations.

& What we do How we do it?

Solutions to Fit Your Needs, Whatever Your Line of Business

Corporate Harmony

Maintaining stringent green practices, we are committed in maintaining and enhancing a harmonious relationship with a wide range of stakeholders, including our clients and the communities in which we operate.

Environmental Stewardship

We focus exclusively on eliminating the risks surrounding data security, compliance, and environmental impact, while maximizing value recovery on IT asset investment for businesses around the world.

Flexible Solutions

Our flexible IT asset disposition and solutions can remove complexity and risk from your operation – allowing you to focus on what you do best.

OUR SERVICES

Simply turning over your equipment to a vendor does not always indemnify your company. If these items end up being improperly disposed off and can be traced back to your company, you are liable, which could ultimately cause severe damage to your business as a whole.

To intelligently capture the enduring value of IT Assets, benefiting our clients, our buyers, and our planet while maintaining ethically sound business practices.

Environmental Stewardship

Our global compliance policy includes stringent controls for:

- Landfill avoidance for all electronic materials
- Compliance with ISO 9001, ISO 14001, OHSAS 18001 and R2
- Compliance with regional requirements including the WEEE Directive in Europe

Recovery Simplified

We understand your desire to manage fewer vendors and keep your business running at full speed. We can help you navigate the requirements and demands of proper disposition, ever-changing certifications, regulations and compliance laws. Our single-source solutions are designed to make it easier to focus on your success.

Full Transparency

We provide comprehensive online reporting tools and metrics to ensure that every step of your recovery, data sanitization and reuse process is compliant and auditable. Whether measured by financial, environmental or social terms, the information you need in order to document value is always readily available.

With a deep commitment to superior service, we empower you to make informed, sustainable decisions; mitigate risks; and generate meaningful and measurable results.

Our Business Areas

Partner with Virogreen to experience superior levels of industry and asset expertise, responsiveness, intelligence, and analytics that achieve high-performance results aligned to your strategic goals.

A proven track record for some of the world's largest organizations.

Enterprise Organizations

Our clients can trust that their company data is secure, their reporting needs are met, their remarketing returns are maximized and their equipment is handled in compliance with all applicable regulations.

Small & Medium Enterprise

We take the protection of your brand reputation and our shared environment seriously. Organizations of all sizes now have access to high quality asset recovery and responsible recycling services from a partner they can trust.

OEMs & Retailers

We provide complex reverse logistics solutions and understand that these reverse streams are large and diverse, and we offer depth of process and refurbishment/remarketing capabilities required to handle them.

Solutions You Can Trust. And Verify.

Data breaches. Environmentally irresponsible disposition. Changing regulations. Lost value. These are the risks in the market. And we're here to solve them. Others may make bold promises, but we back our promises with investments in the global processes, systems and compliance protocols required to deliver solutions you can trust.

● Secured Destruction

We provide data destruction for majority of storage devices in the market with standards up to US Department of Defense – M5220 requirements.

● Compliance Standards

Our Machinery facilities also have the following compliance standards to government mandates.

- PCI DSS Data Security Standard
- NIST
- NIST SP 800-36
- NIST SP 800-88
- HIPAA
- PIPEDA
- GLBA

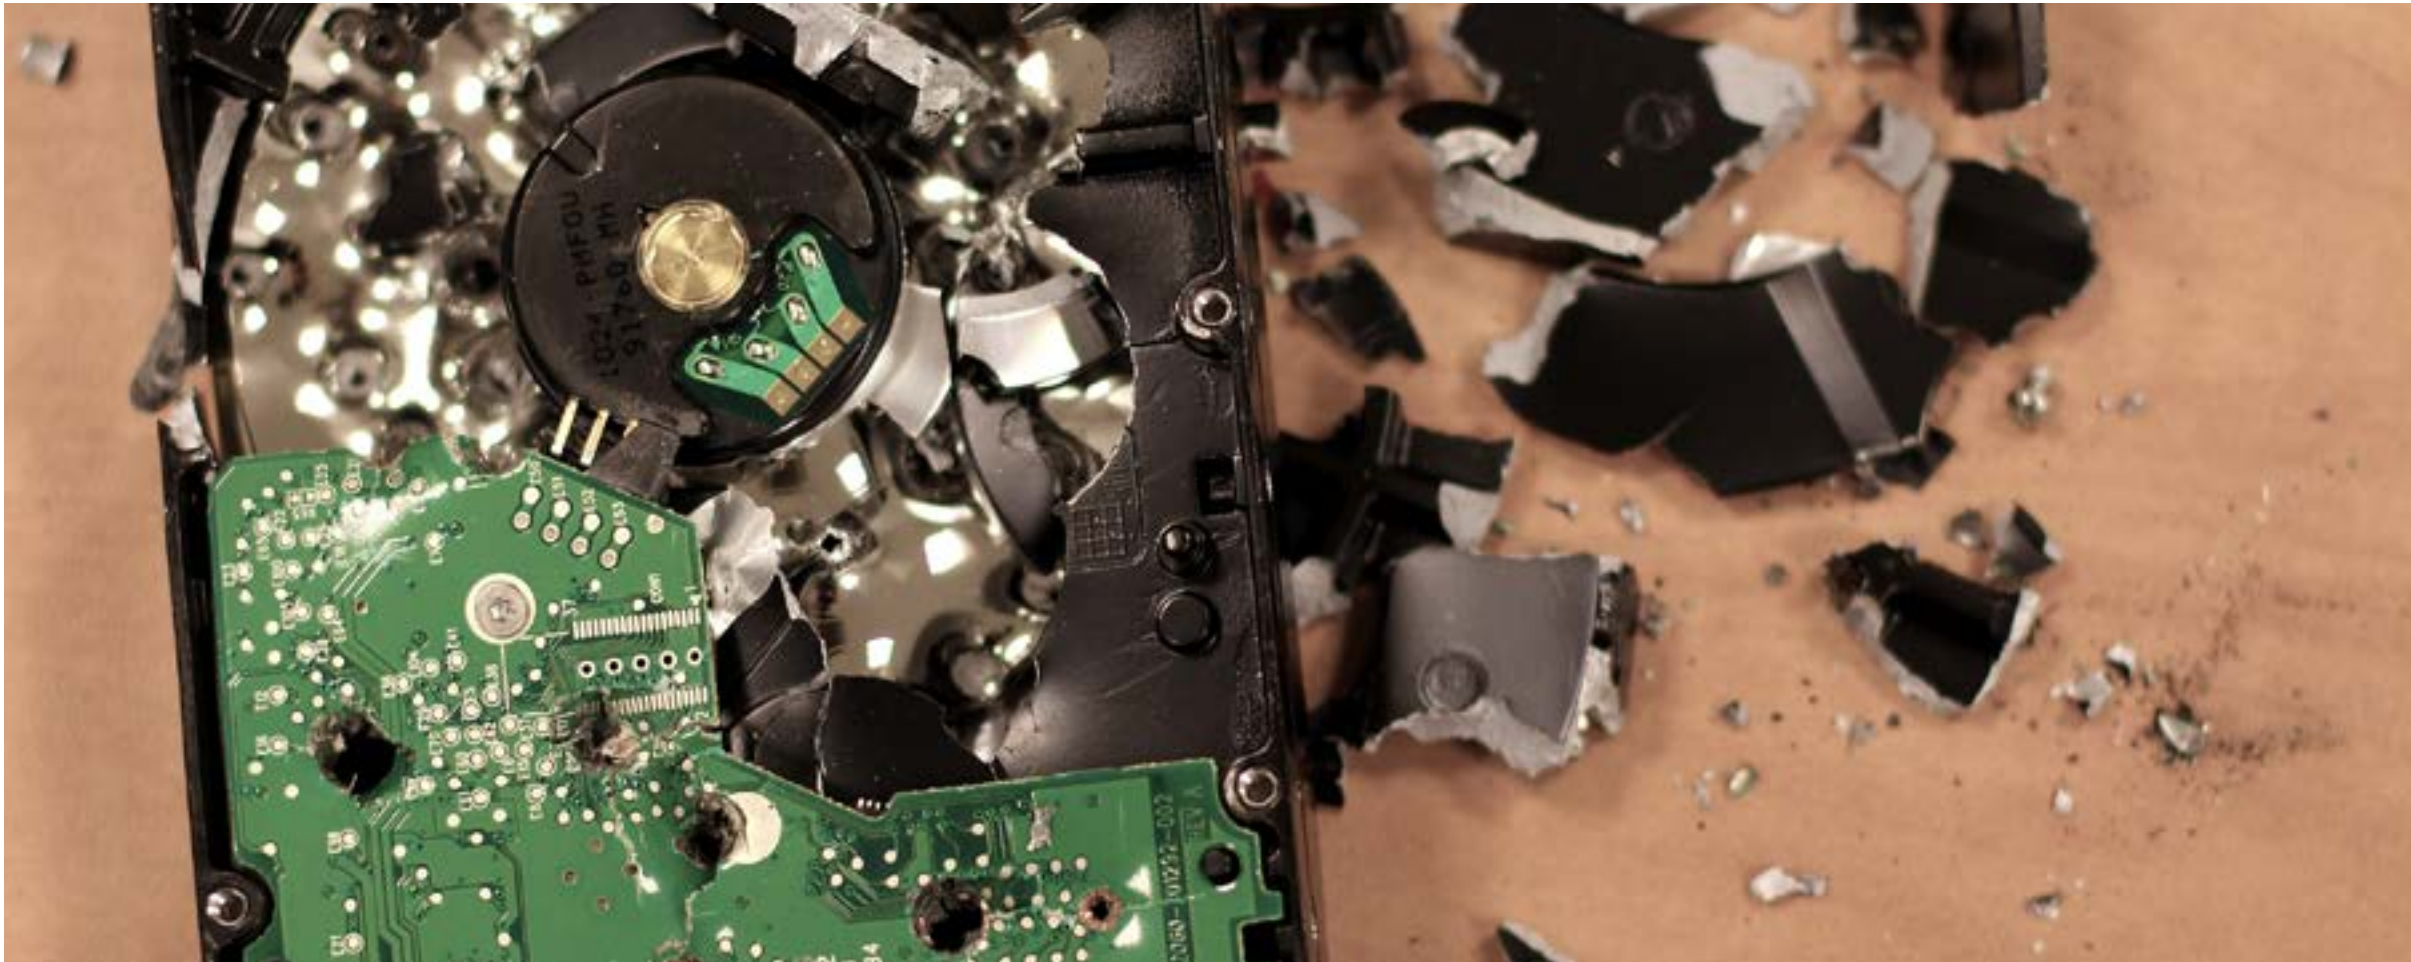

● Refinery Standards

1. Guaranteed Trans-boundary Movements of E-waste - BASEL PERMIT.
2. Zero Hop Policy – Secure Direct Shipment.
3. Shipment Time: 14 – 21 days.
4. Consistent Analysis – Min % variable.
5. Best Recovery return policy for our customers – max. 45 days towards Final Settlement.

- Certify chain of custody from receipt through disposition
- Ensure consistent quality and service level delivery
- Comply with myriad regulations on a global basis
- Streamline costs and minimize risk of downtime
- Provide brand protection worldwide
- Continuous assessment and improvement

A One Stop Zero Hop Solution

- A One Stop Zero Hop Solution
- Direct Shipment to Refinery.
 - Reduced Shipment duration.
 - Maximum Recovery Return.
 - Shorter Recovery Return Settlement.

Industrial Standards

- Our Machinery facilities have the following specifications to meet industry standards:
 - Capacitive Discharge
 - Up to 300 Hard-disk drives per hour
 - 9,300 Oe, .93 Tesla nominal
 - CE and ANSI Certified.
- Always looking to help our customers with their requirements on E-waste recovery.
 - Manufacturing trails / Prototypes e-waste
 - Manufacturing e-waste
 - Expired / Obsolete e-waste

Data Sanitization Processes

We offer options to erase data either at our facility when equipment is received or onsite at our customer's premises:

- The data sanitization is performed to meet your requirements up to compliance with the new NIST 800-88.R1 standard which is widely recognized by governments, OEMs, and global 2000 companies as the standard of measure; 5-pass and 7-pass overwrite options are also available.
- The sanitization process based on NIST ensures that no data can be restored by extended keyboard attacks (NIST CLEAR) or extended laboratory attacks (NIST PURGE), depending on your independent requirements. Drives with damaged sectors that cannot be overwritten or with failed erasures are removed and destroyed.
- Process audits and third party audits are performed to ensure complete compliance.

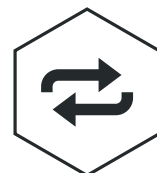

Onsite Data Degaussing

Catered for our customers with demanding security requirements as it also renders the hard disk drive inoperable for reuse.

Onsite Drives Shredding

Shredders are transported to your location and can safely be operating inside your facility.

Onsite Data Erasure

Onsite data overwrite is performed to exceed the NIST 800-88 standard (supersedes Department of Defense 5220-22-M standard) and it ensures that 100% of sectors are overwritten.

Recovery Processes

Virogreen provides a one-stop solution for decommissioning and retiring end-of-life IT equipment. Our solution manages all aspects of the process including transportation, identification, testing, repair, data sanitization, and value recovery.

We have a solution that efficiently removes, packages, and transports all manner of desktop IT and enterprise assets. We maintain complete control over the entire process to ensure absolute data security and maximum environmental sustainability.

IDENTIFICATION, TESTING, AND REPAIR

From recovery through final disposition, we have one of the most detailed audit and tracking packages in the industry. We track and record any hardware detail you request through our proprietary database and offer you a range of reporting options. This typically includes the serial number, asset tag number, asset type, make/model, and detailed unit configuration. All identifying labels, marks, asset tags and references to our customer are removed.

EXPANDED SERVICES

Value Recovery

Our volume and scale provides a unique advantage; to develop a global marketplace of diverse buyers including resellers, retailers, brokers and overseas dealers.

Reverse Logistics

A secured and unbroken chain of custody is a critical part of the process and provides the peace of mind and audit trail required by the most security-conscious corporations.

End of Lease

Lease termination procedures can be complex and are often more costly than anticipated. We provide a comprehensive end-of-lease lease management service that helps customers reduce lease costs.

Stress-Free ITAD

'ITAD' a concept which was labeled a few years ago by Gartner as IT asset disposition (ITAD), referring to the process of methodically removing IT equipment from an IT environment and responsibly disposing of the retired devices.

Simply turning over your equipment to a vendor does not always indemnify your company. If these items end up being improperly disposed of and can be traced back to your company, you are liable, which could ultimately cause severe damage to your business as a whole.

With that being said, at Virogreen, we are not only capable of responsible disposal but can also maximize your return on investment for equipment that is still in working condition or that can be sold for parts.

Our IT Asset Disposal (ITAD) service is designed to make recycling waste IT and electrical equipment as easy and stress-free as possible for your business. Let our ITAD experts help to safely remove your old IT equipment and Waste Electrical and Electronic Equipment (WEEE), to ensure your business is legally compliant.

Metals Recovery

We believe in the importance of utilizing resources effectively to ensure a sustainable society. In our recycling and environmental services, we draw on technologies developed in our smelting and refining business as we are actively promoting recycling to recover non-ferrous metals as well as detoxifying industrial waste, both while aiming at a goal of zero emissions of secondary wastes.

"aiming at a goal of zero emissions of secondary wastes."

Refinery Technologies

Applying and combining physical separating techniques with various hydro or pyro-metallurgical processes.

Value Focused

From sustainability benefits to greater financial return on retired assets and data protection.

One Global Standard

We operate from a single global standard enabling a unified approach to every customer, every asset.

RESPONSIBLE E-WASTE ETHICAL RECYCLING

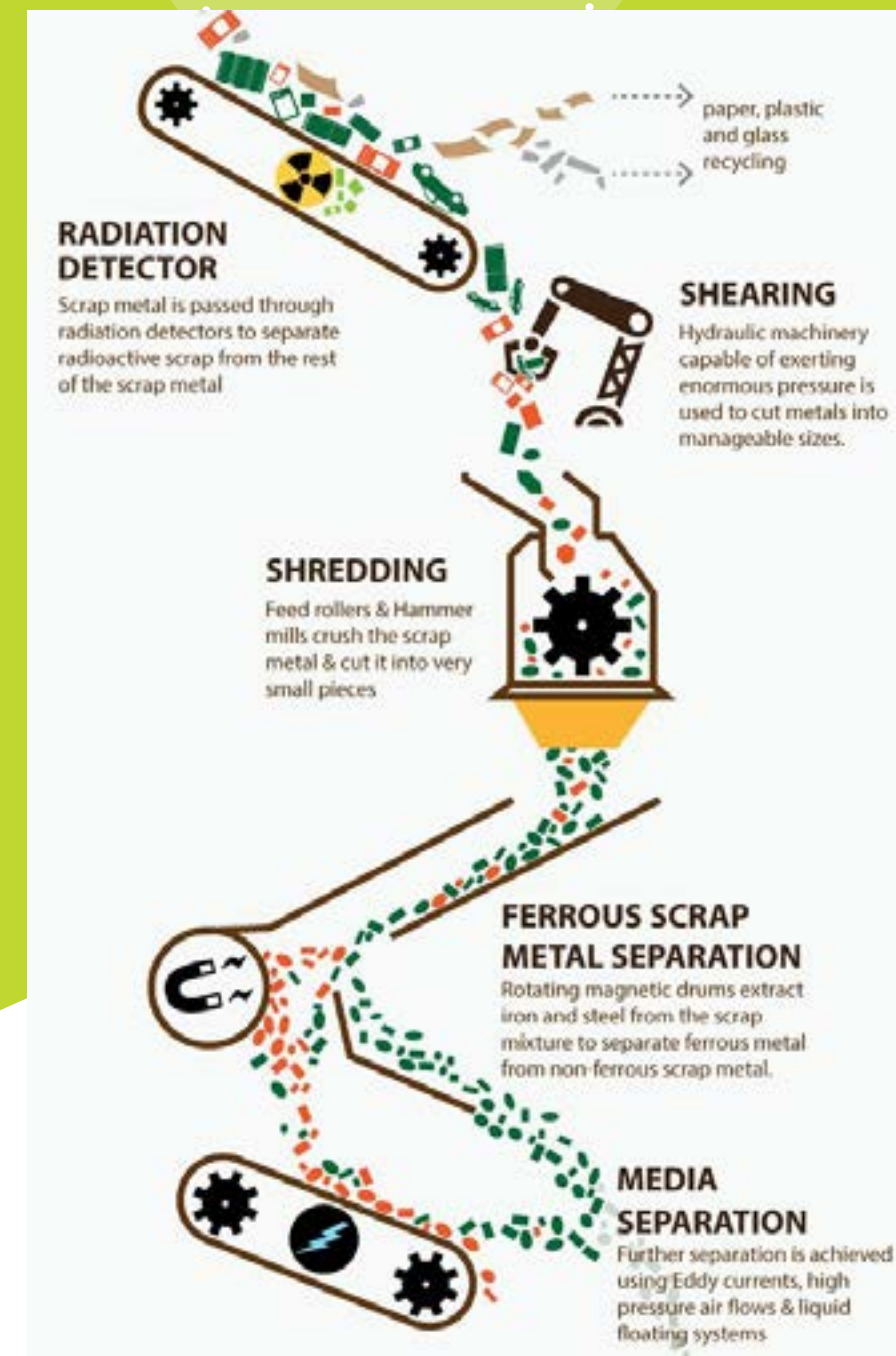

Zero Stop Policy

Our uniform standards ensure our clients now have a single-source option that delivers consistent levels of service around the world.

Ethical Social Responsibility

We integrate sustainable and environmentally responsible disposal techniques.

GLOBAL OVERVIEW

Virogreen leverages its breadth of resources to help shape its global compliance program for Value Recovery and meet the challenges of today, for the issues of tomorrow. To create a better future for our environment. To ensure quality, and to deliver compliance that is universally applicable, implementable and accountable ... in every area of the globe.

Corporate Social Responsibility

Virogreen's recycling bin is a flagship e-waste recycling programme launched in 2017. As an recycling services provider in electronic products, the programme indicates Virogreen's commitment to environmental sustainability.

Who is involved?

The programme kicked off with a collaborative consumer-driven environmental effort between one of the leading telecommunications provider and Virogreen Singapore. As environmentally responsible corporate citizens, the partnership have decided to work together to promote and encourage Singapore citizens to dispose their e-waste in a responsible manner. In 2018, the programme expanded to include grassroots organisations such as People's Association and the various Community Clubs and Resident's corner to enhance and educate the public about recycling of electronic wastes and its many benefits.

And, of course, you! See the list below for the bins near you! Help to protect our environment and start recycling your e-waste!

Recycling made Easy!

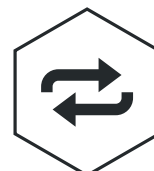

Electronic waste (e-waste) is refers to discarded electrical and electronic items such as wires, mobile phones, computers, batteries, etc. E-waste contains toxic substances and its improper disposal can lead to serious pollution and health problems. With the rapid changes in technology, shorter product life-cycles, changes in media (tapes, software, MP3) and falling prices, there is a fast-growing surplus of electronic waste around the globe. Hence, there is a need to provide more avenues for individual consumers to recycle their e-waste.

Ensures harmful substances are not released into the environment.

Grows our green economy and local employment opportunities.

Reduces strain on Singapore's waste disposal facilities and frees up land for better quality of life for residents.

Fun Fact

- A 2017 global report estimates that the world generated 44.7 million tonnes of e-waste in 2016 – equal to 9 great pyramids!

Fun Fact

- About 11kg of e-waste – equal in weight to 73 mobile phones – is discarded by each person a year!

Fun Fact

- About 60,000 tonnes of e-waste are generated a year. This is equivalent to the weight of 220 Airbus A380 aeroplanes!
